Easily Convert PDF Tax Returns Into Excel Spreadsheets in Minutes

Nambri TaxXL is a first-of-its-kind resource that automates the conversion of PDF tax returns (including scanned files) into Excel spreadsheets. This cloud-based solution offers a simple, secure, and fast way to extract and organize data from business tax forms. Nambri streamlines your workflow with the elimination of manual data entry, improving accuracy, reducing errors, and enhancing productivity. Additionally, you can rest easy knowing that your data is safely encrypted and secured via a Secure Sockets Layer (SSL).

Benefits of a Nambri TaxXL Subscription

- **Extract your PDF tax files and convert them to Excel spreadsheets**—Select your PDF tax forms to quickly extract the data from the files and they will be organized in a structured manner within an Excel spreadsheet for ease of use.

- **Automatically calculate multiyear common-size statements**—Common-size income statements and balance sheets are financial statements that allow for easier comparison between companies of different sizes or industries. These statements express financial data as a percentage of total revenue (for income statements) or total assets (for balance sheets).

- **Save time and effort**—Manually entering tax information can be time-consuming and can take valuable resources away from other activities within a firm. Become more productive and accurate wit with Nambri TaxXL.

Average Data Extraction Time:

Three minutes for five years of data

Tax Forms Supported:

- Form 1120
